

FOR IMMEDIATE RELEASE

Pounding Mill, VA – May 14, 2025

Flash Weather AI Launches FLASH Shield™ Portable. Predictive Weather Safety for Every Outdoor Operation

Flash Weather AI today expands its industry-leading weather intelligence solutions with **FLASH Shield™**, the world's first fully portable, AI-driven safety notification system designed to protect any organization affected by severe weather. From golf course events to construction sites and roofing crews to high-school and college athletic fields, and parks and recreation, **FLASH Shield™** delivers minute-by-minute lightning predictions and automated on-site alerts, empowering teams to act before storms arrive.

"When seconds matter and lives hang in the balance, you need more than warnings, you need foresight. Now with FLASH Shield you get exactly that, rock-solid reliability with no missed or false alarms and intelligent notifications you can count on," said Steve Snedegar, President of Flash Weather AI.

Key Benefits & Features

- AI-driven lightning forecasting that predicts strikes up to 60 minutes in advance with 99.6 percent accuracy and 1 km resolution, updating every two minutes
- Automatic visual and audible warnings via integrated strobe lights and horns that activate with the threat are in the triggered radius.
- Solar-powered, cellular connected portability, transported in rugged Pelican® cases for setup and teardown in minutes

- Flexible options to buy, lease, or rent, with most orders shipping within 24 hours and backed by a 12-month limited warranty

About Flash Weather AI

Flash Weather AI raises the bar in real-time storm safety. Its hyper-local weather intelligence platform combines proprietary data with patented AI algorithms to provide 1 km forecast mapping, 99.6 percent-accurate lightning predictions, and tailored updates every two minutes. The Flash Weather AI mobile app keeps users one step ahead of storms with two-minute alerts on localized hazards, forecasts for current and saved locations, and real-time strike data. With a rapidly growing footprint across the U.S., Canada, India, and South America, Flash Weather AI is on a mission to make the world safer through advanced weather intelligence.
